-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rossman et al. (6,179,665).

Rossman et al. disclose a surface integrated power, communication and data device having a power array, communication array, data array, housing and means for mounting the housing but do not appear to disclose a mounting bracket removably engaging the housing or for Claim 10, a pivot mechanism (hinge for Claim 13) connecting the housing to the housing flange. Figures 6 and 7 illustrate that the housing can be mounted on some sort of brackets via (200/202). Rossman et al. contemplate other forms of attachment hardware and that locations include walls and under tables (see Col. 7, lines 15-48). Therefore, it is the opinion of the Examiner that use of a removable mounting bracket and/or pivot would have been obvious as a means to offer more locations for mounting and wherein a pivot allows for increased ease in the connecting and the disconnecting to and from various connectors on the various sides of the housing; the increased options help to enhance organization of the environment in which the outlet is utilized. Figures 1 and 2 illustrate the various features and Column 3, lines 30-67 describe the disclosed features by Rossman et al., i.e., surge protectors for the arrays for Claims 4, 15 & 16, RJ11 and RJ45 jacks for communications and/or data for Claims 2, 3, 11 and 12, a power button (16), indicators (17, 19) and a reset (18) for circuit breakers for Claims 5-9, 14.
